

## Joint Master Positioning Clamp

The lightweight aluminium jaws holds pipe sizes 63mm-180mm without the need for reducing liners.

When coupled together with the angle maker you have the versatility of a positioning clamp to hold pipe in 45° and 90° bends.

The quick opening handle and the patented centering system allows you to install the clamp easily over the pipe until the weld process has finished.

### FEATURES

- Made from lightweight aluminium and steel
- Easy to install and use
- Suitable for pipe sizes 63mm-180mm
- No reduction lines required for smaller branch outlets
- Minimal excavation required below pipe
- Available in 2 or 3 way configuration
- Patented in-line pipe centering system

# Joint Master Positioning Clamp

## Positioning Kits

Code	Description
01-09-001	Joint master carrying bag
01-09-002	Joint master positioning clamp 63-180mmØ 3 way branch leg 750mm
01-09-003	Joint master positioning clamp 2 way straight base
01-09-004	Joint master positioning clamp 63-180mmØ with 500mm angle maker
01-09-005	Joint master positioning clamp 63-180mmØ with 750mm angle maker
01-09-006	Joint master positioning clamp 63-180mmØ 3 way 500mm branch tee
01-09-007	Joint master positioning clamp 63-180mmØ 3 way 750mm branch tee
01-09-009	Joint master positioning clamp 63-180mmØ spare Jaw set complete
01-09-010	Joint master positioning clamp 63-180mmØ tee branch adapter 500mm
01-09-011	Joint master positioning clamp 63-180mmØ jaw set & branch tee only
01-09-012	Joint master positioning clamp 63-180mmØ tee adapter 750mm
